

**Work with a partner but you must complete and color your own picture!**

- 1. Choose 1 Plant or Animal as your main organism**
- 2. Choose 5 Traits from other organisms that you would like to genetically engineer into your organism. Be creative these do not have to be practical just interesting.**
- 3. Draw your Genetically Engineered Organism. Do not worry about being a great artist just do your best.**
- 4. Label the 5 traits and color your organism**

**Organism Name** \_\_\_\_\_

**Define Genetic Engineering (Gene Splicing)** \_\_\_\_\_

**List 3 advantages your organism would have because of the genetically engineered traits.**

- 1.** \_\_\_\_\_
- 2.** \_\_\_\_\_
- 3.** \_\_\_\_\_
